

Dear Dr. Beougher & Dr. Jones & All of Willowbend Dental Staff:

I really do not know where to begin my adventure at Willowbend Dental. All I can say is that I was a person that always had a fear of going to the dentist to one now that looks at dentistry as a fun uplifting way of my life. I walked into your office with a fear of unknowing and pain. I just know that I wanted my teeth taken care of and seeing Dr. Beougher on Good Morning Texas I thought I really wanted to take care of my teeth by seeing that show. I was tired of every Dentist saying that I needed to go to this Dentist to do this and this one to do that. I wanted one that could do everything. Yes you guys did it all for me and more. I feel better than I have ever in my life and am so confident with my new smile. I have always wanted pretty teeth and always looked at other people that had pretty teeth and said one that will be me. Not only did you give me a beautiful smile you made feel like a new person. I am so proud and confident of my looks today. Everywhere I go people really do look at me and say that I do have a beautiful smile one that I have always wanted. Today I was at the gym and I saw a friend that I have not seen in a year. He said you look so different in a good way. I did tell him about my teeth and what a difference yall did for me. Your staff and team are terrific and everyone made me feel so at home. I enjoy going to the dentist and who would have ever thought I would say that. I love my new look. All love all of the staff and the efforts that everyone made to make me feel as comfortable and caring every time I came for my visits. My experience with Willowbend has been lovely and I will miss not coming as often as I have. Of course I will come for check-ups and you know I am considering doing the bottom six. Just give me some time. I love Willowbend and my new LOOK. Thank you for making a scary experience become one I will always remember. Willowbend -You're the greatest and I love my new smile.

Love Ya.

Julie Weber
